### **EXAMINER'S AMENDMENT/COMMENT**

An examiner's amendment/comments to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The Examiner has made no amendments to the application.

#### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Drawings***

The drawings filed on 10/29/2003 have been approved.

#### **Cited References**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Japanese patent document, which constitutes prior art cited by applicant, discloses the use of a light source mounted within the steering wheel for illuminating vehicular steering column mounted indicator signal switches. The lights of the light source are mounted to the backside of the steering wheel in proximity of the indicator switch levers with markings. Note the enclosed form PTO-1449.

The following references are cited by the Examiner: Ramamurthy et al disclose the use of markings on indicator switch levers and the illumination of the markings by a remotely located light source. Shitanaka et al disclose the use of a plurality of switches

Art Unit: 2832

associated with a steering wheel. Leng and Liburdi disclose the use of multifunctional switches located integrally in the steering wheel body (Leng) or multifunctional switches mounted in controllers mounted proximate to the backside of a steering wheel assembly.

**Reasons for Allowance**

The following is an examiner's statement of reasons for allowance: The prior art does not disclose a steering wheel having switches mounted to its front side and back switches mounted to the backside of the steering wheel to integrally rotate with the steering wheel and use of switch markings on the back switches with a back light source provided in the front switch assembly to continuously illuminate the back switch markings. Ramamurthy et al do not teach the use of a first switch arrangement mounted on the steering wheel although lighting is provided by a light source in the steering wheel to illuminate the indicator switch markings if and when the light sources are located proximate to the indicator switch lever markings. The Ramamurthy et al switches remain fixed to the steering column and are not continuously exposed to the light source(s) mounted in the steering wheel due to rotation of the steering wheel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

Claims 1-16 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R Scott who can be reached at **(571) 272-1999 after 2/03/2004**.

The examiner can normally be reached on weekdays from 1 to 5.
